Hi Dan,
I'll be working with Jeff to split this report into two documents. We'll keep you informed if we run into any issues.

BTW – if you want an ASPECT person at a future public meeting to address technical issues, please let us know when that might be so we can plan accordingly.
Thanks...John

Tim, here is the edited version of the "v3" report on West Lake and Coldwater Creek containing the markups and notes we generated in our call yesterday. Please split this into separate West Lake and Coldwater Creek reports as discussed and make the other additions, changes and figure deletions we discussed. I believe the decision was made yesterday to not use Google Earth to release any data, so the sections on that can be removed. I think DeAndre asked you yesterday if you could get it back to us by this Wednesday, April 24. I will be on furlough April 22-24, so if you have any questions in my absence you can call Matt Jefferson or DeAndre.

Thanks,
Daniel R. Gravatt, PG

Hi Dan,
Attached is the latest version of the report for another round of review/comment.

It incorporates many of the previous comments and still requires input from R7 to resolve remaining issues.

We look forward to finalizing this report and are willing to participate in any public meetings to help address technical issues as needed.

Thanks...John
